Helicopter working

An approach where you 'hover' at height to see the broad picture, but 'lower' into the details as an when needed.

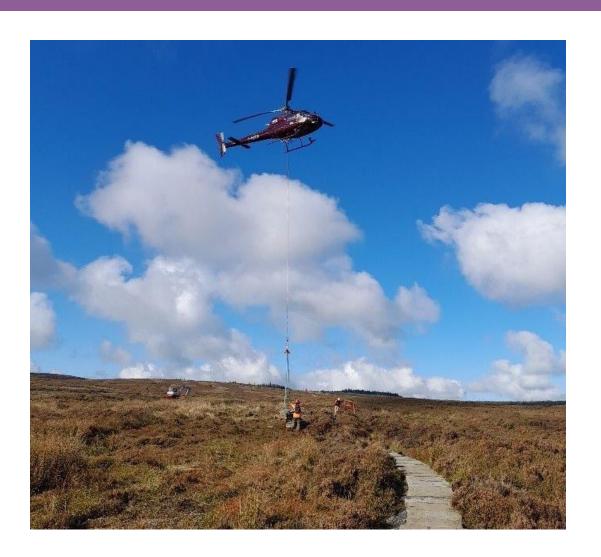

The key is remembering to take off again and return to the position of overview.

Helicopter working connection building

Having 'lowered' into a working group, forum or network and gained an insight into the work they're doing, when you later 'lower' into a different group with a mutual interest or goal you direct the two groups toward each other.

The three lakes of agreement

Lake 1 We all agree this is a good idea

Lake 2
I think this is a good idea and you are ambivalent about it (or vice versa)

Lake 3
We disagree
on this idea at
the moment
